

When you need to teach remote classes,
hold parent-teacher conferences,
or meet with your peers
with minimal planning at minimal cost...

Real-time Remote Classroom

With the HP Virtual Training Room and SPS WEMS Recording Services, your school system will truly encompass the spirit of 'No Child Left Behind'! In addition, you will be able to increase the flexibility of classes and meetings with minimal planning at minimal cost - an important feature in today's economy. This solution will enable your teachers to tutor students, deliver classes to remote students, or hold parent-teacher conferences without leaving their office. HP Virtual Training room uses a rich environment providing live interaction via synchronous web based training. This solution also supports peer to peer collaboration among teachers, guidance counselors, or student interest groups. These rooms are enabled with Video and Voice over IP to provide you the same experience of a live class in a virtual setting and your classes can be recorded for future playback or archival purposes.

- Real-time Remote Classroom will:**
- Cut down your travel costs by remotely tutoring students who are unable to attend school for any reason.
 - Make it possible for students from other schools to attend a high level class without leaving their home school.
 - Enable your teachers and students to have their classes and meetings recorded for future reference or for use as a study aide by students.
 - Enable students or teachers to fully participate virtually in club or special interest group meetings from home.
 - Allow a teacher to deliver lessons to multiple remote students at the same time.

Teachers can quickly launch HP Virtual Training Room from their system trays and give a quick key to a student, parent or other teacher to start a session in seconds. They can also use the web interface provided with all HP Virtual Rooms products for room and event management.

Real-time Remote Classroom

The HP Virtual Training Room offers the following features in an easy-to-use interface :

- Hand-raising and questions manager tool where the students and teachers may post questions and answers while a lesson is in session.
- Application sharing/shared control for demonstrations and practice so that both the teacher and student can share documents that are saved on their individual PCs. Snapshots can be taken of the shared document creating the ability to annotate the snapshot.
- A Survey tool allows the teacher to ask quick Checkpoint questions of the students.
- Content management allows the teacher to organize her room content which may include PowerPoint, Adobe PDF, web pages, and graphics, so that she can provide a full lesson using all of her materials.
- A variety of multi-colored annotation tools for focusing attention on presentation materials.
- Private Chat for one to one discussions and Room Chat for group discussions.
- Web touring which follows the clicks of the web tour leader.
- A Back Pack feature to store frequently used documents, files and materials so that they are easy to access when needed.
- Attendance tracking for all of your lessons and meetings.
- Voice over IP to enable students and teachers to talk to each other without incurring any telephone charges, while Video allows the students and teachers to see each other. Both of these features do require some addition equipment or hardware.
- Microsoft® Outlook integration for scheduling meetings and sending meeting invitations.
- AES 256-bit SSL encryption to safeguard your confidential data.
